Getting Started | Find Products | My Bids | Order History

Getting Started

Here's how NexTag.com works:

1 Search for desired computer products

Find the product you need either by entering the keywords in the search box and clicking on the 'Search' button or by using our well-organized product directory. Click on the product of your choice and we will give you a list of sellers along with their asking price for that product. (If you have registered, we will give you the total price including tax and shipping.)

2 Negotiate the price you want

Do you like the price offered by any of the merchants?

Yes. Then go ahead and buy it.

No. Then bid on the product and let the sellers know what you are willing to pay. You may either want to include all the sellers in your bid or only your favorite sellers. **Some sellers will respond immediately and we will notify you by e-mail as soon as the others respond.**

Response time, if not immediate, will generally be a matter of minutes during business hours.

3 Buy on your terms

Soon you may hear from a seller who is willing to give you the product at your price or is willing to offer you a price that's closer to your desired price. That's it! Go ahead and buy the product.

It is possible that you may receive one or more counteroffers from the sellers. You can then decide if you want to continue bidding or go ahead and buy the product at the best counteroffers you received.

It's that simple!
